### Profile

I am fascinated since many years by the Web development in general as well as the development of mobile apps recently. Also I'm 23 years old and I've the driving license. Nowadays, the media are inevitable, that's why the computing jobs fascinate me so much. I believe the World Wide Web is the greatest thing the human race has ever developed, and I'm proud to contribute towards its ongoing development by building quality Web sites and promoting accessibility and usability.
